For more stability, tie SkyTails
Pour plus de stabilité, attachez les SkyTails® ensemble.

LAUNCHING - ASSISTED LAUNCH

- The kite requires a minimum wind of 7 mph / 11.3 kph. Let out approximately 75 feet / 22.86 m of line and have an assistant hold the kite.
- With your back to the wind, release the kite and take a few steps backwards, the kite will rise into the air. Tug line to gain altitude, let out line to gain distance.
- For storage, reverse assembly steps and place into package. Store your kite in a cool dry place. Excessive heat and/or sunlight can damage the package and kite.
